Young Parents Project

Please join us in supporting teen mothers and their children by participating in these events for the **Young Parents Project!**

The Florida State University's **Young Parents Project** is a home visiting program for court-involved teen mothers and their children whose goal is to break the generational cycle of abuse, early parenting, and involvement in the juvenile justice system.

What we do... A team of professionals provides home visits, outreach, and care coordination on many issues – health, education, parenting, and connections to community. The project's intervention focuses on the mom/baby relationship as the vehicle for change.

Why we do it... Young families in the court system have complex lives that impact their ability to parent a child. The **Young Parents Project** supports both the mom and the baby in an effort to change the trajectory of their lives now and for future generations.
